Nazaire Shabazz

DIGITAL MEDIA DEVELOPER

About Me

I work very well with computers, preferring to code and script, but also good with designing and editing, and enhancing images. I have taken classes in both programming and designing. I can make apps for Windows, Android, or Mac. I am diligent and serious about my work, yet also very open-minded and enthusiastic. I can work very well alone, but I love constructive criticism, and will work even better with others.
